# Introduction to Programming

## (/introduction-to-programming)

### / Git, HTML and CSS (/introduction-to-programming/git-html-and-css)

### / Video Recap: Core CSS Concepts and Debugging

Text

We're close to the end of the course section, which means we've covered a lot of new concepts related to Git, HTML, Markdown, and CSS. At this moment, we'll take a break to review the core CSS concepts that we've learned thus far.

In the following 10 minute video, you'll get a review on:

- Inline styling.
- Using an external stylesheet.
- Classes and Ids.
- Style inheritance in CSS.
- Debugging CSS using the browser's developer tools.
